NEW DATA POINTS

- For example, if a member worked 10 hours in a week (regular hours, and overtime hours) you will be asked to provide following information:
 - **Regular hours worked = 5 hrs.**
 - **Overtime hours worked at time and a half = 2 hrs.**
 - **Overtime hours worked at double time = 3 hrs.**
 - The system will calculate the hours earned as follows:
 - $5 \text{ hrs.} + (2 \text{ hrs.} \times 1.5) + (3 \text{ hrs.} \times 2) = 14 \text{ hrs. earned}$
 - **SHIFT HOURS: Continue to report shift hours using the Shift Agreement codes**
-

VALIDATING YOUR SUBMISSION

Validations give you notice that something needs to be corrected in your batch.

There are 2 types of validations:

Warnings

You **can** complete the batch without addressing Warnings – *not recommended*

Examples:

- Hours earned is between 300 and 500
 - Member with same name exists with different SIN
 - Contributions received for unknown member. Person will be created
-

VALIDATING YOUR SUBMISSION

Errors

Will **not** allow you to complete the batch

Examples:

- Invalid SIN
 - If you are an Owner Operator and the hours reported is < 150 hrs. earned
 - Job class does not match with the agreement for this employer
-

ADJUSTMENT BATCHES

- If the adjustment batch is **positive** (missing hours)
 - Go to the month that is missing hours – At a Glance
 - Create a second batch and enter the missing hours.
 - **Assign the batch as an Adjustment and give a reason.**
 - Complete all Events
 - Submit
-

ADJUSTMENT BATCHES

NEGATIVE ADJUSTMENT BATCHES NEED TEIBAS APPROVAL!

You will be able to confirm the batch, but hrs. will not post to employee's record.

System will create a Task to the Employer Service team

- *Job class changes*
 - Create a new **adjustment** batch with negative hours for the wrong job class **and** positive hours for the correct job class.
 - **Upload any support through task management if needed**
 - **Description = ECR batch ID**
 - *Too many hours reported/sent for wrong person)*
 - Go to the month and enter a negative **adjustment** batch
 - Assign as an **adjustment** batch
-
